

333 Stealth Colonel

Bio-based nylon made from corn husks

WATSON
GLOVES
Quality since 1918

BIO-BASED NYLON

15gg seamless knit liner made from 17% ReStalk™ bio-based nylon, that is derived from corn husks and stalks, provides 4-way stretch for maximum comfort

FOAM NITRILE PALM

Molecule foam nitrile palm coating reduces water consumption by 80% during the manufacturing process versus regular nitrile

TOUCHSCREEN COATING

Conductive coating on palm and fingers can be used on all touchscreen devices

ERGONOMICALLY FORMED

Ergonomically formed to reduce hand fatigue

SNUG-FITTING KNIT WRIST

Snug-fitting knit wrist keeps out dirt and debris

A bio-based product is comprised partly of either biological materials, including renewable domestic agricultural materials such as corn or sugar cane, forestry, or marine materials such as plants. Bio-based fibres provide an alternative to petroleum derived products such as virgin nylon. Using bio-based fibres reduces CO₂ emissions during production versus virgin nylon. ASTM D6866-18 shows 17% biobased carbon content.

COATED

REDUCES 74.66g OF
